### Lighting Alteration Compliance Methods

#### One-for-One Alteration Method (typically called retrofit projects) ($§141.0(b)2iiii$)
Includes permanently changing the light source, changing the optical system (e.g., reflectors), replacing lamps along with new ballast and/or drivers, and replacing the entire luminaire at the existing location. Limited to buildings and tenant spaces in multi-tenant buildings ≤ 5,000 ft² that can show 40% reduction of installed wattage. Energy Code is not triggered when ≤50 luminaires per floor or tenant space are altered per year.

#### Entire Luminaire Alteration Method ($§141.0(b)ii$ and $ii$)
Includes removing and reinstalling ≥10% of the existing luminaires, replacing and/or removing ≥10% of luminaires in an enclosed space, and redesign of the lighting system. Excludes enclosed spaces with only one luminaire. The Area Category Method ($§140.6$) is used to determine the maximum wattage allowance per space type, which will dictate lighting control requirements.

#### Rewiring Alteration ($§141.0(b)2i$)
Includes replacing or adding lighting circuits, and relocating, modifying or replacing wiring between switch, panels and/or luminaries. Alterations to components of the lighting wiring must meet all applicable requirements in $§141.0(b)2i$. For example, relocating an existing area control must meet all applicable requirements in $§130.1(a)$, since they are included in $§141.0(b)2i$. These projects will need to meet the manual area control requirements. Separation of general lighting from other types of lighting such as decorative lighting is only required for new or complete replacement of lighting circuits. Existing controls functionality must be maintained, but they may be expanded upon.

### When is the Energy Code Triggered? Example Project Scopes

<table>
<thead>
<tr>
<th>Project Scope</th>
<th>Energy Code Triggered</th>
</tr>
</thead>
<tbody>
<tr>
<td>Replacing/upgrading lamp and nothing else being done to the luminaire (considered a repair)</td>
<td>No</td>
</tr>
<tr>
<td>Replacing/upgrading &lt;10% of the luminaries in an enclosed space (alteration exception)</td>
<td>No</td>
</tr>
<tr>
<td>Replacing/upgrading ≥10% of the lamps and replacing ballast with same ballast type per enclosed space (considered an alteration)</td>
<td>Yes</td>
</tr>
<tr>
<td>Upgrading luminaire by adding an LED driver or upgrading the ballast (considered a One-for-One Alteration)</td>
<td>Yes</td>
</tr>
<tr>
<td>Removing luminaires and nothing else (not considered an alteration)</td>
<td>No</td>
</tr>
<tr>
<td>Removing and upgrading ≥10% luminaires (upgrading ballast and/or adding LED driver) (considered an alteration)</td>
<td>Yes</td>
</tr>
<tr>
<td>Upgrading lamp and ballast/driver for an enclosed space with only one luminaire (alteration exception)</td>
<td>No</td>
</tr>
<tr>
<td>Adding lighting controls to a space and nothing else (rewiring exception)</td>
<td>No</td>
</tr>
<tr>
<td>Adding/replacing lighting circuits (rewire trigger for area controls)</td>
<td>Yes</td>
</tr>
<tr>
<td>Adding walls and not changing the luminaires (area controls required) (not considered an alteration)</td>
<td>No</td>
</tr>
<tr>
<td>Taking down ≥10% of the luminaires, then putting them back up for asbestos abatement (alteration exception)</td>
<td>No</td>
</tr>
<tr>
<td>Taking down ≥10% of the luminaires, then putting them back up in same place (i.e., painting the ceiling) (considered an alteration)</td>
<td>Yes</td>
</tr>
<tr>
<td>Altering the luminaires while also remodeling the space (i.e., changing or removing walls) (considered an alteration)</td>
<td>Yes</td>
</tr>
<tr>
<td>Changing the reflected ceiling plan (relocating and/or adding luminaires) (considered an alteration)</td>
<td>Yes</td>
</tr>
</tbody>
</table>

### Lighting Alteration Compliance Method Options: Retrofit (One-for-One Alteration) Project

<table>
<thead>
<tr>
<th>Project Scope has Triggered Code</th>
<th>One for One</th>
<th>Using ≤80% LPD</th>
<th>Using &gt;80% LPD</th>
</tr>
</thead>
<tbody>
<tr>
<td>When project alters &gt; 50 luminaires in a year in a ≤5,000 ft² building or in each ≤5,000 ft² tenant space (or all common areas) in a multi-tenant building while reducing the existing wattage by ≥40% of all altered luminaries combined</td>
<td>Yes</td>
<td>Yes</td>
<td>Yes</td>
</tr>
</tbody>
</table>
| Project limited to:  
• > 50 luminaires altered in a year  
• ≤5,000 ft² building or each ≤5,000 ft² tenant space (or all common areas) in a multi-tenant building AND/OR  
• Reducing the existing wattage by <40% of all altered luminaries combined | No | Yes | Yes |
| Project is not eligible for the One-for-One Alteration Method but is able to show that post-altered + existing-to-remain luminaire wattage of each room is ≤80% of the wattage allowed per $Table 140.6-C$ (Area Category Method) | No | Yes | Yes |
| Project is not eligible for the One-for-One Alteration Method but is able to show that post-altered + existing-to-remain luminaire wattage of each room is >80% of the wattage allowed per $Table 140.6-C$ (Area Category Method) | No | No | Yes |

*If a retrofit project also includes changing the reflected ceiling plan by adding or relocating luminaires, or if rewiring, see Entire Luminaire Alteration Method*

</tbody>
</table>

### Mandatory Controls
*Requirements Based on Lighting Alteration Compliance Method Used*

**Acceptance testing** requirements of §130.4 are not required for alterations where lighting controls are added/ altered to control ≤20 luminaires for the entire permitted project (for indoor, outdoor and sign lighting)

**Manual Area Controls (on/off):§§130.1(a)1, 2 and 3**
- For each enclosed space
- Excluding >0.2 W/ft² egress lighting

**Multi-level Control:** §130.1(b)
- Enclosed spaces ≥ 100 ft² AND
- Connected lighting load > 0.5 W/ft²
- Excluding restrooms
- Excluding Healthcare Facilities

**Auto Shut-Off Control:**§130.1(c)1-8
- Excluding Healthcare Facilities

**Whole Bldg. Shut-Off:** §130.1(c)1-4

**Partial-ON, Vacancy or Occupancy Sensor:**§130.1(c)5

**Partial-OFF:**§130.1(c)6-7
- §130.1(c)6A: Warehouse aisle/stacks
- §130.1(c)6B: Library book stacks
- §130.1(c)6C and 7A: Stairs and corridors
- §130.1(c)7B: Parking garages

**Primary Daylight Control:**§130.1(d)
- ≥ 120 watts in primary/skylit zone(s) (parking garage ≥60 watts) AND
- ≥ 24 ft² fenestration (parking garage ≥36 ft²)
- Excluding areas shaded per Exceptions 1 and 2
- Excluding retail merchandise sales/wholesale showroom sidelit zones

**Demand Response:**§110.12(c)
- Permitted area >10,000 ft²
- Excluding spaces ≤0.5 W/ft²
- Excluding where health & safety do not permit reduced lighting

*Operation of existing controls must not be removed or altered with lighting alteration project.*

*See Title 20 Appliance Efficiency Regulations for additional LED General Service and Small Diameter Directional Lamp requirements.*
